现代教育

北京乐成学校（BCIS）持续探索未来教育，在现有国家课程与国际课程体系相结合的基础上，自主研发了创思课程模式，并已获得国际学校协会（CIS）和美国西部院校协会（WASC）认证。创思课程以项目式学习为核心，聚焦个性化实践与行业深度探索，允许学生根据所选课程，参与基于项目的体验式学习，从而构建以能力为导向的个人学习档案。创思课程已经成为与 IB 课程并驾齐驱的个性化升学路径，从 9 年级起，学生可以在 IB 文凭课程和创思课程两者之间任选其一，并以此获得高中文凭。创思课程是 BCIS 最具学术含量的路径之一，学生毕业时不仅可获得 BCIS 文凭及相关证书，还能根据其选修并成功完成的课程及学习经历获得其他文凭。

In High School, BCIS introduces its bespoke IDEATE program to foster high levels of student agency through a co-designed personalized pathway. Accredited by CIS and WASC, IDEATE stands alongside the IB as a distinctive pathway to university and a future career. From Grade 9, students may choose IB programmes or IDEATE —both leading to a recognized high school diploma. IDEATE can be the most rigorous pathway at BCIS, as students may graduate with multiple university credits. Through the IDEATE Program, students can earn a BCIS Diploma as well as other diplomas based on their chosen and successfully completed coursework and learning experiences. Depending on the specific courses a student pursues, they may engage in project-based, experiential learning, in which students build competency-based portfolios.

“创思课程教会我，真正的热爱是让知识成为连接世界的纽带。在 BCIS 从事晶体培育和冬虫夏草纪录片等跨学科项目时，我学会了将好奇心转化为实践能力。如今在庆应大学，我继续打破学科壁垒 – 这一切都得益于 IDEATE 赋予我的跨学科思维能力。

IDEATE taught me that true passion is making knowledge a bridge to the world. My interdisciplinary projects at BCIS-from growing crystals to documenting cordyceps-showed me how to turn curiosity into capability. Now at Keio, I continue breaking down barriers between fields, just as IDEATE prepared me to do.”

“创思课程项目不同于传统学术课程，它强调建构主义学习理论，让我能够通过项目（真实情境）主动构建知识，将理论性原则与实践操作相结合，把所学技能迁移运用到全面且具有研究深度的知识探索中。

The IDEATE program differs from traditional academic curriculums, emphasizing constructivist learning theory to enable me to actively construct knowledge through projects (real-world contexts), integrating theoretical principles with practical operations, and applying learned skills to comprehensive, in-depth academic inquiries.”

罗切斯特大学 心理学专业

“即便我后来写过无数篇论文，也没有一篇能比得上我在创思课程项目第一学期完成的第一个项目的复杂性和强度。我清晰地记得，当获准用数月时间深入钻研一个真正着迷的课题时，那种兴奋与雄心 - 那是一种罕见而令人振奋的自由。

With all the papers I have written since, none have matched the complexity and intensity of my very first project during IDEATE's first semester. I vividly recall the excitement and ambition I felt when given the opportunity to spend several months delving deeply into a subject that genuinely captivated me. It was a rare and exhilarating kind of freedom.”

“我感受到了对真实自我的认可 - 而不仅仅是对一个成绩优异的学生，或是在特定场景中扮演某个角色的人的认可。我从未真正失败过 - 要么赢，要么学有所获。

I felt appreciated as me-not only as a high-performing student, or someone fulfilling a role in a particular scenario. I never really lose-I either win, or I learn.”
